

Closures January-May 2017: Tunnel, Battery Spencer Parking, and Some Scenic Pull-Outs on Conzelman

The National Park Service and Federal Highway Administration are working to preserve the historic Baker-Barry Tunnel to the Marin Headlands. The tunnel will be closed to all users January 9 through early May 2017 for repairs, improved lighting, and new sewer and water lines. For public safety, some vehicle parking and pull-out areas on Conzelman Road will be closed to ensure a flow of traffic to the headlands. Closures include:

- Baker-Barry Tunnel (the "5-minute tunnel" is closed to all vehicles and bicycles 24 hrs / 7 days)
- Parking at Battery Spencer (hikers & bicyclists can still access Battery Spencer)
- Vehicle Pull-Outs on Conzelman Road (east of the McCullough Road traffic circle)
- No commercial vehicle access to Conzelman Road west of the McCullough Road traffic circle
- Additional closures may be required during peak visitation periods

Destinations in the Marin Headlands remain open for business during construction. Avoid times of peak congestion (rush hours and weekends after 2PM). For more information, including alternative destinations for views of the Golden Gate Bridge, visit or call:
